# EasyAccess 2.0 Release Notes

## Version 2.2.0 2015/03/28

- You need to enter "domain" information when login.

  For example, the domain admin was "mycompany", and login user name was "engineer1". After the upgrade, you will need to enter both "mycompany" as domain and "engineer1" as user name to login.

- Supports point-to-point mode. (PC and Android)
- Supports assigning multiple HMIs and HMI groups to one single user.
- Supports one click to open VNC viewer and HMI viewer.
- Fixed the problem where detection of nearest VPN servers sometimes does not work properly.

## Version 2.1.1 2014/12/24

- Fixed a login problem if windows login name contains non-ASCII characters.

## Version 2.1.0 2014/09/11

- Added Certificate Authorities (CA) auto-update mechanism.
- Ethernet-to-Ethernet Pass-through allows using same LAN network.
- Supports multiple languages.

## Version 2.0.0 2014/08/08

- EasyAccess 2.0 release.
